May 11 2015 11 There are multiple ways of writing out a given complex number or a numberingeneral. Usually we reduce things tothe simplest terms for display saying $0i$ is a lot cleaner than saying $1 \cdot 1i$ for example.Thecomplex numbers are a field

This means that every non $0i$ element has a multiplicative inverse and that inverse is unique Aug 30 2010 There are infinitely many possible values for 1^i corresponding to different branches ofthe complex logarithm.Theconfusing point here is thatthe formula $1^x = 1$ is not part ofthedefinition of complex exponentiation although it is an immediate consequence ofthedefinition of natural number exponentiation Jan 15 2013 Possible Duplicate How do I convince someone that $1+1=2$ may not necessarily be true? I once read that some mathematicians provided a very length proof of $1+1=2$

Can you think of some way to Jun 13 2020 Is there a formal proof for $1 \cdot 1 = 1$? It s a fundamental formula not onlyinarithmetic but alsoin thewhole of math

Is there a proof for it or is it just assumed? Intending on marking as accepted because I m no mathematician and this response makes sense to a commoner. However I m still curious why there is1way to permute 0 things instead of 0 ways Mar 30 2020 This is same as AA 1

It means that we first applytheA 1transformation which will take as to some plane having different basis vectors

If we think what istheinverse of A 1? We are basically asking that what transformation is required to get back totheidentity transformation whose basis vectors are $i \wedge 1 \ 0$ and $j \wedge 0 \ 1 \ 1 \ 2 \ 3$ Aug 24 2016 False Proof of $1=1$ [duplicate] Ask Question Asked 9 years 4 months ago Modified 9 years 4 months ago Apr 28 2020 I m self learning Linear Algebra and have been trying to take a geometric approach to understand what matrices mean visually

I ve noticed this matrix product pop up repeatedly and can t seem to de Sep 25 2020 4 I am wondering how do I go about calculating1 in chances from a percentage? Example A1 in2 chance is 50% and 0.5as a decimal

What I want to do I havethevalue 0.1431 14.3% and want to convert that into a1 in chance any help is much appreciated thanks.
