May 11 2015 11 There are multiple ways of writing out a given complex number or a numberingeneral. Usually we reduce things to the simplest terms for display saying $\$0$ is a lot cleaner than saying $\$1^1$ for example. The complex numbers are a field

This means that every non $\$0$ element has a multiplicative inverse and that inverse is unique Aug 30 2010 There are infinitely many possible values for $\$1^i$ corresponding to different branches of the complex logarithm

The confusing point here is that the formula $\$1^x = \1 is not part of the definition of complex exponentiation although it is an immediate consequence of the definition of natural number exponentiation Jan 15 2013 Possible Duplicate How do I convince someone that $\$1+1=\2 may not necessarily be true? I once read that some mathematicians provided a very length proof of $\$1+1=\2

Can you think of some way to Jun 13 2020 Is there a formal proof for $\$1 \times 1 = \1 ? It s a fundamental formula not onlyinarithmetic but alsointhe whole of math

Is there a proof for it or is it just assumed? Intending on marking as accepted because I m no mathematician and this response makes sense to a commoner. However I m still curious why there is1way to permute 0 things instead of 0 ways Mar 30 2020 This is same as AA 1

It means that we first apply the A 1transformation which will take as to some plane having different basis vectors

If we think what is the inverse of A 1? We are basically asking that what transformation is required to get back to the Identity transformation whose basis vectors are $i^1 0$ and $j^0 1$ 1 2 3 Aug 24 2016 False Proof of $1=1$ [duplicate] Ask Question Asked 9 years 4 months ago Modified 9 years 4 months ago Apr 28 2020 I m self learning Linear Algebra and have been trying to take a geometric approach to understand what matrices mean visually

I ve noticed this matrix product pop up repeatedly and can t seem to de Sep 25 2020 4 I am wondering how do I ago about calculating1 in chances from a percentage? Example A1 in2 chance is 50% and 0.5 as a decimal

What I want to do I have the value 0.1431 14.3% and want to convert that into a1 in chance any help is much appreciated thanks.
