Apr 18 2021 Windows 8.1 or Windows 10 See also Fix connections to wireless displays or docks Windows Support How to Check if Windows 10 PC Supports Miracast Here s How 1 If you are projecting wirelessly to another PC be sure to install the Wireless Display optional feature on the PC you are projecting to for the Connect app to be available on it Aug 31 2020 The Wireless Display optional feature adds the Connect app in Windows 10 allowing other devices on the same wireless network to use Connect to wireless display to wirelessly project to your computer with Miracast supported hardware May 27 2020 Usually the list of wireless displays are only of available displays you can connect to like how it shows for available Wi Fi connections

It just depends on what s available in your area

If you like you can use an option in the the tutorial below for a Connect Wireless Display shortcut to help cut down on the clicks Sep 17 2020 To connect your Bluetooth headset speaker or headphones to your Windows 10 PC you ll need to pair the device first

This tutorial will show you how to create or download a Connect Wireless Display and Audio Devices shortcut that opens directly to the Connect flyout in Windows 10 Nov 2 2018 How to Unpair a Bluetooth Device on Windows 10 PC Bluetooth is a short range wireless technology which enables wireless data transmission between two Bluetooth enabled devices located nearby each other

If one Bluetooth enabled turned on device is in discovery mode and discovers another Bluetooth enabled device nearby it can query for its services and choose to establish a Bluetooth Sep 10 2016 What is the connection between metered wifi and bluetooth

When my wifi is metered I get message as shown in pic below Jan 11 2023 The Bluetooth on off toggle works as intended my headset disconnects and reconnects as expected

By the way the printer and devices window is also empty even though I do have a printer mouse and keyboard up and running and showing in device manager

The issues seem related according to online searches Mar 15 2022 When software wants to use a Bluetooth connection it looks in the Registry for that connection or so I assume. If the Registry does not reflect the reality of what connections exist problems will arise

I m running a dual boot system with Kubuntu Linux and the headphones work there Jun 28 2020 Connecting Wireless Display I connected a wireless display today which works very well. This is a smart tv with wireless and a pc that has a modern wifi card. But there is always a but ! there is no sound
