Jun 30 2025 Olderadolescentgirls are disproportionately affected by intimate partner violence. Pregnancy complications and unsafe abortions are the leading causes of death among 15 19 year old girls

Mostadolescentmortality and morbidity is preventable or treatable but adolescents face specific barriers in accessing health information and services Oct 19 2020 In many waysadolescentdevelopment drives the changes in the disease burden between childhood to adulthood for example the increase with age in sexual and reproductive health problems mental illness and injuries Oct 11 2023 The World Health Organization WHO is releasing the second edition of its Global Accelerated Action for the Health of Adolescents AA HA! guidance

The document aims to equip governments to respond to the health and well being challenges opportunities and needs of adolescents. The guidance provides the latest available data onadolescenthealth and well being

It also outlines an updated Adolescenthealth is starting to attract the attention it deserves and is increasingly prominent in global health initiatives

This includes the Global Strategy for Womens Childrens and Adolescents Health areas such as mental health young peoples mental health is the theme of 2018s World Mental Health Day on 10 October and management of sexually transmitted infections Nov 26 2024 WHO fact sheet on adolescents health risks and solutions includes key facts and provides a definition information on specific health issues WHO response Sep 1 2025 Adolescence 10 19 years is a unique and formative time

Multiple physical emotional and social changes including exposure to poverty abuse or violence can make adolescents vulnerable to mental health problems

Promoting psychological well being and protecting adolescents from adverse experiences and risk factors that may impact their potential to thrive are critical for their well being Apr 10 2024 Adolescentpregnancy remains a critical global issue especially in low and middle income countries where 21 million girls aged 1519 become pregnant each yearhalf unintentionally

Although globaladolescentbirth rates have declined progress is uneven with the highest rates in sub Saharan Africa Latin America and the Caribbean Oct 23 2025 TheAdolescentand Young Adult Health Unit AYH leads and coordinates WHO wide efforts to improve the health and well being of adolescents and young adults Austria country profile for child andadolescenthealth Publications Documents Persistant gaps in immunization coverage leave children vulnerable to dangerous vaccine preventable diseases

At least 95% of children should be vaccinated Oct 23 2025 TheAdolescentand Young
