May 18 2023 Sexuality education equips children and young people with the knowledge skills attitudes and values that help them to protect their health develop respectful social and sexual relationships make responsible choices and understand and protect the rights of others

Evidence consistently shows that high quality sexuality education delivers positive health outcomes with lifelong impacts Nov 24 2025 Sexual health cannot be defined understood or made operational without a broad consideration of sexuality which underlies important behaviours and outcomes related to sexual health

The working definition of sexuality is a central aspect of being human throughout life encompasses sex gender identities and roles sexual orientation eroticism pleasure intimacy and reproduction In some settings criminalization of consensualadultsame sexbehaviour as well as stigma discrimination and violence against MSM have created an environment that compromises peoples human rights and makes them less likely to access health services for HIV viral hepatitis sexually transmitted infections STIs and other essential services Nov 30 2020 To monitor progress to the global target of 95% of men who have sex with men are reached by HIV prevention diagnosis and treatment services by 2025 estimates of the number of men who have sex with men need to be as close to the true number as possible Addressing disparities through gender responsive approaches to TB prevention and care is critical for achieving equitable health outcomes and accelerating progress towards ending the TB epidemic Feb 14 2025 Condoms when used correctly and consistently are safe and highly effective in preventing unwanted pregnancies and sexually transmitted infections including HIV

They are the only contraceptive method that can prevent both pregnancy and sexually transmitted infections STIs as well as being safe inexpensive and widely available Nov 1 2019 In many countries adolescent girls are more likely to believe that violence is justified than adolescent boys

Further in many countries adolescent girls and boys are more likely to justify violence than adult women and men Jan 31 2025 Female genital mutilation FGM includes procedures that intentionally alter or cause injury to the female genital organs for non medical reasons Nov 26 2024 WHO fact sheet on adolescents health risks and solutions includes key facts and provides a definition information on specific health issues WHO response Case notifications of people newly diagnosed with TB in 2023 were 75% of the estimated TB incidence overall but this varied by age and sex 76% for adult men 80% for adult women and 55% for children aged 0-14 years

Among children aged <5 years the figure was only 48%.
