Buy online pick up in store in 30 minutes Oil filters clean the engine oil as it circulates through layers of synthetic fibers or pleated paper within the filter

This filtration captures and holds various sizes of particulate matter from large debris to microscopic particles ensuring that only clean oil flows back into the engine

This process is essential for maintaining the oil's viscosity and lubrication properties over time Advance Auto Parts is your source for quality auto parts advice and accessories

View car care tips shop online for home delivery or pick up in one of our 4000 convenient store locations in 30 minutes or less Brake pads and shoes are critical components of your vehicle's braking system that serve different roles

Brake pads are a part of the disc brake systems primarily on the front wheels where they clamp onto a rotor to create the friction needed to stop the vehicle. On the other hand brake shoes are in drum brake systems often on rear wheels where they press outward against a rotating drum.
