I have been looking all over to figure out whether or not After Dark is compatible for Windows 10 but I can't find any information

If possible I would like it to have all the modules like they w Mar 21 2023
Since Windows 11 doesn't have the light/dark theme depending on time of day I decided to implement one through Task Scheduler

Basically at certain times I'd change the binary values of Computer\ Apr 26 2019 I saw that there is a force dark mode but it seems like there isn't any force light mode

Can I find an updated list of Google Chrome command line switches somewhere else or any other solution that might work? Thanks in advance! The issue occurs and is most noticeable when you go from a dark window to a light window

The contrast gets blown out and the display slowly adjusts the backlight to normalize the contrast

I have a dark wallpaper in Windows 10 so an example of this happens whenever I'm on the desktop and open Chrome or the Google homepage which is mostly white Aug 24 2018 I have an Asus F510UA laptop running Windows 10 that I use on a daily basis

One of my major gripes with it is that whenever I go on battery power and view content that has a dark background like VS Code IntelliJ Idea YouTube in dark mode etc

It looks like the screen gets darker even if my brightness is set at 100% Jul 25 2024 My laptop screen turns off when I connect or remove the power cable. Charging cable

To be more specific the screen will turn off and on again it will flash to black for a short period of time Jan 30 2015 Screen brightness setting maxed but not bright. Hello everyone this is my first post regarding technical support ever thanks in advance for any help provided

I have a Lenovo Flex 15 laptop that Jun 2 2012 After a couple of days I upgraded some parts of my PC and since I wanted to check out the UEFI booting speed of Windows 8 I figured I'd give it another shot. After installation I knew that I have to make my OS dark so after installing drivers and basic software I set out to make my OS as dark as possible Jan 25 2010 1 I have a widescreen Samsung LCD that goes black after it's been on for 5-10 seconds

Once the screen goes black turning the monitor off then on again brings the image back for a few seconds
