Artificial intelligence AI is the capability of computational systems to perform tasks typically associated with human intelligence such as learning reasoning problem solving perception and decision making

It is a field of research in computer science that develops and studies methods and software that enable machines to perceive their environment and use learning and intelligence to We believe our research will eventually lead to artificial general intelligence a system that can solve human level problems

Building safe and beneficial AGI is our mission 2 days ago artificial intelligence AI the ability of a digital computer or computer controlled robot to perform tasks commonly associated with intelligent beings Artificial intelligence AI is a set of technologies that empowers computers to learn reason and perform a variety of advanced tasks in ways that used to require human intelligence such as Nov 18 2025 Explore the latest artificial intelligence news with Reuters fromAlbreakthroughs and technology trends to regulation ethics business and global impact Artificial intelligence AI is technology that enables computers and machines to simulate human learning comprehension problem solving decision making creativity and autonomy Sep 30 2025 Artificial intelligence AI is the theory and development of computer systems capable of performing tasks that historically required human intelligence such as recognizing speech making decisions and identifying patterns At its core AI refers tocomputer systems capable of performing tasks that typically require human intelligence such as reasoning learning perception and language understanding

These systems analyse vast datasets recognize patterns and make decisions with unprecedented speed and accuracy Learn whatartificial intelligence AI is and how it works explore the different types of AI see examples of AI and discover the benefits of AI Explore what definesartificial intelligence how it has evolved and what we might expect from it in the future

What Is AI? The field of artificial intelligence arose from the idea that machines might be able to think like humans do.
