Plan your view now Mar 30 2023 Hi I'm developing a business profiles management software where we're submitting business profiles in bulk to Bing and displaying the status over there. But unfortunately we couldn't find a way to provide a link to Bing maps that represents a particular business profile

I've tried Bing Maps Custom URL but it does not work for everyone even if I set the centre point with exact geocode of the 4. On the next screen click Ctrl + F to search and type `ypid` into the search bar. It will highlight any instance where `ypid` is within the code

You can grab the YN873 number and plug it into the generic Bing Maps URL which I have in red below then add that URL to the location > pages data Aug 8 2024 Bing
