1 day ago The year of top ranked Chinese open weight models 2024 sawsomeearly signs of life from the Chinese AI labs mainly in the form of Qwen 2.5 and early DeepSeek. They were neat models but didnt feel world beating

This changed dramatically in 2025 Jun 11 2024 Simondemonstrates how to installLLMusing pip or homebrew and run prompts against OpenAIs API

He showcases features like continuing conversations and changing default models 14 hours ago Some2025 takeaways inLLMs reasoning as a signature feature coding agents were useful subscriptions hit \$200 month and Chinese open weight models impressed This is the third in my annual series reviewing everything that happened in the LLM space over the past 12 months 14 hours ago LLMsare always doing some form of interpolation between different points in the past

Yes they can create a new SQL query but it s just remixing from the SQL queries that have existed prior

This still makes them very useful because a lot of engineering work including writing a custom text editor involve remixing existing engineering work Dec 31 2024 A lot has happened in the world of LargeLanguageModelsover the course of 2024

Heres a review of things we figured out about the field in the past twelve months plus my attempt at identifying key themes and pivotal moments. This is a sequel to my review of 2023 Dec 30 2024 This post shows some examples I use

Ive got into the habit of running anLLMlocally on my machine in the background having it sit there so I can pipe text or quick local queries into it Aug 28 2025 In this milestone 150th episode hosts Kelly Schuster Paredes and Sean Tibor sit down withSimonWillison co creator of Django and creator of Datasette andLLMtools for an in depth conversation about artificial intelligence in Python education IADT mempublikasikan pedoman pertamanyapadatahun 2001 dan memperbaruinyapadatahun 2007

Pemutakhiran berikutnya dipublikasikan dalam jurnal Dental Traumatologypadatahun 2012 Pentingnya pengukuran TIKpadapasien cedera kepala berat sangat ditekankan

Pertama merupakan alat pantau untuk identifikasi dini penambahan lesi massapadapasien yang paralisis dan disedasi dimana pemeriksaan neurologik dibatasipadaukuran dan respons pupil Perbedaan yang nyata dengan trauma kepalapadadewasa adalahpadaanak masih terjadi proses perkembangan otak sehingga trauma kepala yang berlanjut menjadi cedera otak merupakan proses kronis Hipnoterapi ini menitikberatkanpadapemberian sugesti sugesti positifpadaklien yang akan menimbulkan perilaku mekanisme koping konstruktifpadaklien
