May 2 2019 The same situation would arise with dumbass versus dumbass one spelling takes ass as a root noun and characterizes the person thus named as also being dumb

So Bottom the Weaver may simply be an ass or he may be a dumbass or again to a modern reader he may be a dumbass a pejorative term with its own distinct connotations Apr 21 2011 Ergo I don t give a rat sass is a humorous back formation of the same idea made a bit punchier for effect

I don t give a flying f_ck is common by the early 70s and the construction is a common trope I want a more appropriate phrase that has the same form give a ** and meaning as the offensive give a f**k d**n s**t

Is there any? There is a strong regional difference too with people of the north using ass and the south using arse. This follows similar lines to pronunciation of bath etc

with northerners using a short a la ass and southerners using a long a as in arse The traditional swear words fuck shit ass damn etc. have had their offensiveness gradually worn down over the past century to the point where in many communities they re generic modifiers

Large parts of the Internet hold to this ethos EDIT This increase in severity stands out to me

My argument is that a boot in the ass is just a harsher way of saying a kick in the pants and in the opposite direction I think the phrase rip a new asshole as in after your performance on the field yesterday the coach is going to rip you a new asshole is a harsher iteration still Jan 11 2022 I was curious about the origin of the phrase quot to give two fucks quot

When did the English language first feature counting to a number to express a level of vulgarity? And why two specificall All manner of ass usages pop up well before 1950 an accent criticized as having lousy broad ass As and familiar sounding locutions such as green ass corporals poor ass southerners and broke ass a waiter

In all these cases the point is that the quality in question draws attention

In narrating we are creating a little movie The more recent Urban Dictionary entry has 4 000 fewer upvotes than the weakass definition above it though the first had a decade to accrue those votes of approval but after getting reposted to Tumblr got over 400 000 likes and reblogs Standard practice is to substitute asterisk when replacing just some letters especially vowels and not normally the first or last letter in a swear word for example sh*t or c**t
