Oct 25 2006 AMD Completes ATI Acquisition and Creates Processing Powerhouse Focused to Drive Innovation Choice and Growth in the Industry with First Platform Solutions in 2007 Unveils Fusion Initiative for Industrys First Integrated CPU GPU Silicon Solutions SUNNYVALE CALIF Dec 29 2004 While particular approaches in graphics processing units design have been pretty different for leading computer visual companies ATI Technologies and NVIDIA Corp

in future the architecture of GPUs from the firms may be fundamentally different as executives from both companies proclaim different approaches for chip internal architectures Aug 15 2004 Huge emergency roadmap changes coming released from a unspecified source

x800 pro 12pipes will be atis mainstream flagship soon as opposed to there lowend highend card with a new msrp of 299\$ it smashes the 6800 n u while being comparitively priced. x800 gt or x800 xt NOT PE 1 Raw performance. I don t see that much opportunity here

Looks like R 300 is making pretty good use of 20 gb sec bandwidth not sure how much more performance per gb can be gotten out of it this is assuming NV30 is based on a 20 gb sec bandwidth type design to begin with Jan 13 2004 ATI Technologies Monday unveiled its new high performance professional graphics card with bumped speed compared to predecessors

The new FIRE GL X2 256t product is based on professional version of ATIs R360 VPU found on RADEON 9800 XT graphics cards

In August 2003 ATI introduced its FIRE Dec 6 2002 Lately ATI Technologies not only became indisputable performance and features leader across broad range of real time computer graphics market segments but also changed its policy improved drivers and software support and became a lot more aggressive than it used to be about two years ago

When Oct 30 2004 Seems that there is some doubt over how the Performance calculations were done

Due to a somewhat arbitrary definition of performance done according to transistor count rather than actual performance Mercury included Nvidia s 6800 enthusiast 6600 performance and 6200 mainstream Oct 6 2004 I noticed that in some of the latest BETA Forceware drivers its support NV48 so maybe it means that nV will release it before christmas afterall any Feb 26 2002 none has developed products based on the GeForce4 Ti 4200 chips Jun 28 2003 In light of new information I suggest everyone not to trust any of the NV36 info we had so far

A lot of it is very wrong and that means the rest most likely is. First of all
