Feb 15 2025 I ve been using Souseek for years and have always been impressed with how stable it runs. I m running version NS 157 13e which I prefer for the interface. I m on a PC. Suddenly today it started crashing

I was using it for about 45 minutes then left it running while I went out for a few hours. When I came back to my laptop the app had crashed

I tried relaunching and rebooting a few times Sep 26 2009 How did you manage to instantiate CComObject<IExtendPropertySheet2> ? The template parameter of CComObject is supposed to be your class usually implementing one or more interfaces not the interface itself
