Sep 14 2004 I ve been very happy with the 3 4HP motor on my grizzly of approx. the same size as your lathe. I keep a stock of motors in the shop in case things break. I also use them to make specialty tools like grinders sanders etc

Let me know if you need a motor Jan 23 2010 Before attacking your localATMfor a few \$20 bills get a new arbor nut and give it a try

The metal for the nut is generally softer than the metal for the arbor and by replacing the nut for only a few pennies you will know if the arbor or the nut are worn out

a stripped bolt arbor will have the threads completely removed Mar 27 2007 I am interested in the Freud EB100 edge bander and am looking for some feedback as to how well it works compared to manually doing it with an iron

Also [] Nov 7 2002 anything like an Oliver Crecent Yates Tannewitz Northfield were some of the best bandsaws ever built. I don t think they re much more accurate than a modern quality bandsaw however the cast iron frames dampen the vibration much better than a welded steel frame

If I could do it over again I would have bought an old iron bandsaw instead of a laguna but mainly because it wouldn t have Aug 1 1981 The basicmachine right consists of a C shaped frame a top mounted spindle chuck and motor and a movable table that can be raised and lowered by a treadle

Located directly beneath the centerline of the cutter spindle is a vertically adjustable guide pin A photocopier is all you need To plan my shop I used a modeling program on my computer but you can use the drawings I created to plan an efficient shop on paper

Photocopy the images on the facing page and arrange them on graph paper to create a plan view of your shop

Take the time to work out the most efficient placement of benches cabinets and machines tak ing into account infeed and Dec 30 2011 I am looking for amachinethat I once worked with but cannot find a way to internet search for it due to the dual use of the term panel router

This is amachinethat has a carriage for a router and slides on rails forward and back and from side to side. It has a bed about 3 x4 or smaller

The router plunges down onto the material and you can slide it for and aft or lock down and push the Sep 1 2002 Q Most heavy machinery is designed to be run on three phase electrical power but a number of options are available to get the tools running in your one phase home shop
