To prevent heat loss the Arctic fox curls up tightly tucking its legs and head under its body and behind its furry tail

This position gives the fox the smallest surface area to volume ratio and protects the least insulated areas Nov 20 2025 Arctic fox *Vulpes lagopus* northern fox of the family Canidae found throughout the Arctic region usually on tundra or mountains near the sea

Fully grown adults reach about 5060 cm 2024 inches in length exclusive of the 30 cm 12 inch tail and a weight of about 38 kg 6.617 pounds From its iconic white coat to its ingenious hunting strategies the Arctic fox is a testament to the power of natural selection

The Arctic fox is circumpolar meaning its range encircles the Arctic. It inhabits the Arctic regions of North America Europe and Asia. Arctic foxes live on the land and sea ice within the Arctic Circle. Winter in the Arctic is unlike winter in most parts of the world

From October to February the sun never rises to shine. Discover more about the Arctic fox the issues and threats they are facing and what you can do to help. The Arctic fox *Vulpes lagopus* is a small fox native to the Arctic regions of the Northern Hemisphere and common throughout the Arctic tundra biome

It is well adapted to living in cold environments and is best known for its thick warm fur that is also used as camouflage. Arctic foxes The Arctic fox is primarily a carnivore that lives inland away from the coasts

They are dependent on the presence of smaller animals most often lemmings to survive. Arctic foxes also hunt for sea birds fish and other marine life. The Arctic fox lives in all the lands of the circumpolar Arctic

In Canada it is found from the northern tip of Ellesmere Island to the southern tip of James Bay. What is an Arctic fox? The Arctic fox looks similar to the common red fox but smaller, furrier and pure white in colour

Its compact body features a number of adaptations that allow it to live in the icy Arctic regions. Arctic foxes are found in the treeless tundra extending through the arctic regions of Eurasia North America Greenland and Iceland. Arctic foxes are found mainly in arctic and alpine tundra usually in coastal areas. Arctic foxes are monogamous and usually mate for life.
