Jan 30 2025 AscitesAscites a buildup of fluid in your abdomen causing a swollen belly. It most often occurs because of cirrhosis a liver disease. Talk to your healthcare provider if you have cirrhosis and notice you're gaining weight very quickly

Your provider will talk to you about treatments which could include a low sodium diet medication surgery or a liver transplant Oct 31 2023 Ascites caused by accumulation of fluid in the abdominal cavity

Learn causes symptoms and treatment Jul 25 2025 Ascitesincrease pressure that causes fluid to seep out and pool in the abdominal cavity it can affect your lungs kidneys and other organs They may interfere with your treatment cause side effects and damage your liver and kidneys

Key points about ascitesAscites happens when fluid collects in spaces in your belly abdomen

As fluid collects in the belly it can affect your lungs kidneys and other organs. Ascitescauses belly pain swelling nausea vomiting and other problems Sep 30 2025 Ascitesrefers to the abnormal build up of fluid in the abdominal cavity or peritoneum which is the lining of the abdomen and abdominal organs

The fluid is generally serous meaning that it's a watery protein poor fluid that is normally present in the body to help reduce friction between organs

However in the case of ascites the amount of fluid is excessive Dec 11 2025 Ascitescauses a build up of fluid in your abdomen and usually occurs as a complication of liver disease

Abdominal pain and swelling can also occur The most common cause of ascites Liver disease Less common causes of ascitesinclude disorders unrelated to the liver such as cancer heart failure kidney failure inflammation of the pancreas pancreatitis and tuberculosis affecting the lining of the abdomen. Ascites tends to occur in long standing chronic rather than in short lived acute liver disorders

It most commonly results For grade 3 or 4 ascites therapeutic paracentesis may be necessary intermittently. Consultation with a gastrointestinal specialist and/or hepatologist should be considered for all patients with ascites particularly if the ascites is refractory to medical treatment.
