Particularly the BPI R4 the router with the strongest configuration in history has been selling well for nearly three years and has received May 23 2025 WhenBananaPi launches a new board on the market OpenWRT doesnt really care

Sure the snapshots try to support the new boards but that doesnt affect the current major version

If there is a new major version at some point the new boards will probably be supported Aug 11 2025 BananaPi BPI F3 with SpacemiT K1 8 core RISC V chip Apr 27 2025 This post is a supplement to [BPI R4] How to use frank w u boot to boot from Nvme on BPI R4

Because NAND u boot does not support uEnv.txt. If we want to modify u boot menu we need to recompile u boot and flash it to NAND Flash
