gotten my step son a Ruger American Go Wild in 7 08 and it amazed me as it
turned out to be a tack driver

Now I have the chance to pick up the same rifle in 7 PRC. Ruger specs says it is
a 24 barrel but they are probably counting Jul 4 2022 Wondering what folks chron

just get a 7 08 and shoot the 110 ttsx or 120 ttsx ? I have a finnlite with a

sacrifice may be too large especially if you are using it for deer at 600yds.
Would it have enough energy due to lost velocity when it gets there

There is no question as to the accuracy. But retained energy is another matter.
For the extra 2 4 and the little amount of weight saved by going with a
shorter bbl could mean as much as 350FPS in the Oct 5 2012 I haven't been able to
find any recent comments on LW barrels

I have found mixed reviews that are 5yrs+ ago. Has anyone had any recent
experiences they would like to share? thanks Mar 21 2014 That is out of the 22

Would it be worth the investment to buy another 30 06 with a 24 inch barrel? 2

need more.
