Nov 2 2015 Picking out a new barrel for a 30 Nosler. Will be having it throated for a 215 Hybrid. I m looking at 9 twist variants and never thought of number of grooves. I ve heard of 5R and done a little research but haven t been fully satisfied with the answers I found

I d like your thoughts on 4 vs 5 Feb 3 2017 5 R rifling with its odd number of lands and grooves has each land opposing a groove. It also has radiused groove corners supposedly giving a better gas seal. It has been claimed that 5 R rifling deforms a bullet jacket less than 6 or 8 groove rifling

For long range shooting this May 7 2014 I was just wondering if 5R rifling polygonal rifling or another type of rifling is better for inherent accuracy if everything else is the same? 375rifleman I am a fan of the polygonal rifling ~ less friction and a better gas seal

The absence of the sharp edges reduces bullet deformity less carbon build up and easier cleaning Oct 16 2012 The 5R Milspec is a rifle that is setup to mil specs example Remington M24 that also uses a 5R rifled barrel

The 5R Milspec uses the same barrel stock and setup as the military M24 sniper rifle Jun 16 2007 Looking at Bartlein barrels almost all of them are 5R rifled. Going to be rebarralling my 300 WM soon. Has a Krieger 1 10 with 3100 rnds on it now

What are your thoughts? Jan 17 2023 My Remington 700 5R rifles are New Old Stock from the now defunct Remington Arms. I have no idea of the quality of the new RemArms rifles and am still purchasing Remington Arms. I also purchased a NIB Rem Model 7 223 Coyote model in all Camo

A delightful light weight rifle! BTW the rifle is not Nickel coated but has a SS finish that is Mar 6 2020 Most 5R barrels are copper magnets less grooves is always best 6 groove is standard The more powder you burn w lighter bullets the less twist your gonna need to be accurate BR shooters use 6mm w 13.5 14 twist using 65 68gr bullets 80 gr requires a 12 twist Feb 23 2019 Two part question here Is there a distinct advantage to Remington s 5R barrels other than they are made from stainless steel over the carbon steel as far as accuracy or durability? if that actually is an advantage

Secondly if I were to obtain one of these the barrel length would probably Feb 14 2012 A lot of shooters use the 5R rifling like the M24 barrel s have. It seems to be very popular. The M40 barrels use 6groove rifling

Is there any pro s or con s between them or is one better than the other at long distance? Feb 3 2011 The 5R though comes at a premium price for a factory rifle and with the problems Remington has had the last five years or so with QC I m
