Oct 10 2021 Conclusion Concerning Brave looks to have substantially lower benchmark scores than Edge. I'm interested as to why Brave is touted as being quicker and more efficient than Chrome while it is not. Brave utilizes a much greater RAM and CPU than Edge and Firefox too

Additionally Brave eats substantially more battery than Firefox as well! Brave > Firefox I know Firefox can be modified for privacy and performance. However if an update comes the modifications may or may not work as they did before. Then new modifications might become necessary

On the other hand Brave has privacy and performance by default. So I don't need to mess with the settings and deal with any broken modification after an update

As for Firefox fork you For discussion regarding the Brave web browser and BAT project including the team future plans and current builds Feb 18 2024 Out of the box brave is probably better but if you do a bit of configuration I think Firefox wins by quite a bit in terms of security and privacy and a lot in terms of convenience and performance Sep 18 2021 I am an avid chrome user and I love chrome but I have recently come across brave and quote like it's idea and functionality

What are your guys thoughts on it and is it safe as in people claiming it makes money in malicious ways ? Thanks Aug 6 2023 Brave is good

Turn off the crypto shit in the settings and remove the icons from the taskbar and homescreen you're good to go Jul 7 2021 Mostly Brave got accused to being a non privacy browser with trackers and other unsecure stuff

I just switched to Brave from Vivaldi so I was worried and wanted to investigate the claims because what are my privacy steps worth if I use a browser that tracks me? I will only look at Brave not Firefox or other browsers How do I stop Brave from updating itself silently and reinstalling a VPN service I never wanted in the first place? I keep removing the BraveVPN Wireguard service manually and I deleted the auto update services too yet somehow the browser continues to update itself silently reinstalling a VPN service that I didn't want nor ask for Jan 24 2023 Brave is better for privacy but some of their business practices have been questioned in the past

Opera has most customization and abilities as long as you don't want a home page button. Opera also has had some questionable business practices

Based on testing I'm a dev and have to test our SaaS apps with all major browsers Brave tends to load pages a bit faster and is a bit lighter Jul 6 2022 I strongly dislike most of Brave's ethos but as a browser it seems to be going in a constructive direction unlike Firefox which is having parts stripped out of it
