Breastfeeding is the normal way of providing young infants with the nutrients they need for healthy growth and development

Virtually all mothers can breastfeed provided they have accurate information and the support of their family the health care system and society at large Dec 20 2023 Most medications can be taken while you are breastfeeding without affecting your baby

If you or your health care provider are worried that taking your medication might affect your breastfed baby check with a specialized pharmaceutical advisory service such as e lactancia infantrisk or lactmed Breastfeeding is the best way of providing young infants with the nutrients they need for healthy growth and development

Virtually all mothers can breastfeed provided they have accurate information and the support of their family the health care system and society at large Feb 20 2018 Breastfeeding is one of the most effective ways to ensure child health and survival

If breastfeeding were scaled up to near universal levels about 820 000 child lives would be saved every year 1. Globally only 40% of infants under six months of age are exclusively breastfed. WHO actively promotes breastfeeding as the best source of nourishment for infants and young children

This fact May 1 2009 WHO and UNICEF launched the Baby friendly Hospital Initiative BFHI to help motivate facilities providing maternity and newborn services worldwide to implement the Ten Steps to Successful Breastfeeding

The Ten Steps summarize a package of policies and procedures that facilities providing maternity and newborn services should implement to support breastfeeding. WHO has called upon all Aug 9 2023 Breastfeeding has many health benefits for both the mother and infant

Breast milk contains all the nutrients an infant needs in the first six months of life. Breastfeeding protects against diarrhoea and common childhood illnesses such as pneumonia and may also have longer term health benefits for the mother and child such as reducing the risk of overweight and obesity in childhood and Dec 20 2023 WHO fact sheet on infant and young child feeding providing key facts breastfeeding complementary feeding feeding in difficult circumstances HIV and infant feeding WHO response Aug 4 2025 World Breastfeeding Week is celebrated every year in the first week of August championed by WHO UNICEF Ministries of Health and civil society partners around the globe

It's a time to recognize breastfeeding as a powerful foundation for lifelong health development and equity
