Introduction BRENDA is the main collection of enzyme functional data available to the scientific community

It is available free of charge via the internet [www.brenda-enzymes.org](http://www.brenda-enzymes.org) BRENDA is a comprehensive database providing detailed information about enzymes including their functions structures and biochemical reactions In order to adapt these SOAP clients for other SOAP methods only the marked yellow lines of source code have to be replaced by the code snippets listed under the respective method see below

In order to use BRENDA's web service you need a valid email address and password Explore tutorial videos on the BRENDA Enzyme Database to learn about enzyme information and search functionalities Wide specificity. Also catalyses transphosphorylations

The expected taxonomic range for this enzyme is Bacteria Eukaryota Archaea 3.1.3.2 osteoclast lysosomal resorption marrow cytochemical rank I osteoclastogenesis cathepsin multinucleated collagen osteoporosis granule beta glucuronidase osteocalcin lymphocyte monocyte prostate specific osteoprotegerin histochemistry periodontal metastases Mar 4 2021 BRENDA The Comprehensive Enzyme Information System Subtilisin is a serine endopeptidase type example of peptidase family S8

It contains no cysteine residues although these are found in homologous enzymes
