Bullying is unwanted aggressive behavior among school aged children that involves a real or perceived power imbalance. The behavior is repeated or has the potential to be repeated over time. Both students who are bullied and who bully others may have serious lasting problems

3 Facilitators Guide Bullying Be More Than a Bystander Bullying is unwanted aggressive behavior among kids and teens that involves a real or perceived power imbalance. That means the person who bullies seems more powerful because of strength or popularity than the person being bullied

The behavior is repeated or could be repeated over time Apr 24 2001 Bullying is widespread in American schools with more than 16 percent of U.S

school children saying they had been bullied by other students during the current term according to a survey funded by the Eunice Kennedy Shriver National Institute of Child Health and Human Development NICHD Apr 14 2003 Bullying is not just a normal if unpleasant part of growing up according to Federal researchers

Rather children who bully other children appear to be at risk for engaging in more serious violent behaviors such as frequent fighting and carrying a weapon

Moreover victims of bullying also are at risk for engaging in these kinds of violent behaviors Sep 20 2010 As agencies schools organizations and communities work together to take a stand against bullying they are finding that this seemingly simple problem is actually very complex

For example new research published in the Journal of Adolescent Health found that those bullied electronically sometimes called cyber bullying such as by computer or cell phone are at high risk for depression Sep 21 2010 Unlike traditional forms of bullying youth who are the targets of cyber bullying at school are at greater risk for depression than are the youth who bully them according to a survey conducted by researchers at the National Institutes of Health Mar 21 2020 A variety of treatments can help a person recover from TBI and can sometimes reduce or eliminate certain physical emotional and cognitive problems associated with TBI

The specifics of treatment including the type setting and length depend on how severe the injury is and the area of the brain that was injured Mar 1 2016 School is a place for learning and socializing with peers

But for the 28% of students who report being bullied school can be a scary place NICHD Adapts New Resource for Bullying School is a place for learning and socializing with peers
