Jun 24 2011 is there a possibility that casting a double created via Math.round will still result in a truncated down number No round will always round your double to the correct value and then it will be cast to an long which will truncate any decimal places

But after rounding there will not be any fractional parts remaining. Here are the docs from Math.round double Returns the closest long to Mar 15 2011 Casting can be used to clearly state that you are calling a child method and not a parent method

So in this case it s always a downcast or more correctly a narrowing conversion Possible Duplicate Casting vs using the as keyword in the CLR I recently learned about a different way to cast

Rather than using SomeClass someObject = SomeClass obj one can use this sy 2 Your problem is not the lack of dynamic casting .Casting Integer to Double isn t possible at all

You seem to want to give Java an object of one type a field of a possibly incompatible type and have it somehow automatically figure out how to convert between the types Feb 5 2025 Why Use [PObject] Type Casting Generally do NOT use [psobject] casts In most cases it is at best an unnecessary virtual no op and at worst results in unexpected behavior

[psobject] is a meant to be invisible helper type used behind the scenes to transparently wrap instances of other .NET types. It is for this reason that a [psobject] instance that wraps an instance of a .NET type acts Sep 25 2008 Direct Casting Types don t have to be strictly related

It comes in all types of flavors. Custom implicit explicit casting Usually a new object is created. Value Type Implicit Copy without losing information. Value Type Explicit Copy and information might be lost

IS A relationship Change reference type otherwise throws exception Aug 26 2008 Static cast is also used to cast pointers to related types for example casting void* to the appropriate type

dynamic_cast Dynamic cast is used to convert pointers and references at run time generally for the purpose of casting a pointer or reference up or down an inheritance chain inheritance hierarchy

dynamic_cast expression Dec 22 2022 2 I m trying to understand how casting between base derived types exactly works in C++. So I wrote a small proof of concept program Jun 23 2013 There are rules about casting pointers a number of which are in clause 6.3.2.3 of the C 2011 standard
