TheColumbiaGlacier is one of Alaska s better known tidewater glaciers both from the standpoint of tourist attraction and the model it provides for scientific investigation. In 1973 it became the object of close scientific scrutiny

In Alaska some 50 to 60 glaciers calve into the sea but exhibit such diversified behavior that they have baffled glaciologists for decades

For instance some ColumbiaGlacier located about 40 kilometers 25 miles west of Valdez near the epicenter of the great 1964 earthquake is rapidly losing its battle for survival. It is the last of Alaska s 52 tidewater glaciers to begin its epic retreat from the sea

Granted Alaska still has plenty of glaciers left but the tidewater glaciers those that empty directly into the sea are on a drastic decline The Alaska Canada boundary was originally established in February 1825 by Russia then owner of Alaska and Great Britain then owner of Canada By glowing red on Sunday night April 12 1981 the heavens over the United States displayed their pleasure with the successful flight of the shuttleColumbia

Perhaps becauseColumbiawas up that night more Americans than usual looked up at the sky and saw the red aurora that covered much of the nation even as far south as Texas Dec 12 2001 ColumbiaGlacier in Prince William Sound and Bering Glacier in the St

Elias Mountains are two glaciers losing ice at an alarming rate during the past decade Columbiahas shrunk by an average of about 21 feet per year along the length of the glacier Bering has lost more than 9 feet per year Nov 14 2025 That helped build the coastal mountains of todays Alaska and BritishColumbia

The combination of the northern fault action and the southern land accretion instigated the counterclockwise rotation at the top of the slender landmass the researchers report in their November publication Feb 11 2016 Southern worms live in the BritishColumbiaCoast Range the Cascades of Washington and Oregon and the Olympic Mountains of western Washington

The southern worms are longer than their northern cousins and resemble black hairs After the first year the tallest trees were those originating from the Prince George area of central and northeastern BritishColumbia and the Peace River area of western Alberta For comparison that s right ahead of theColumbiain area drained and right after it in discharge

TheColumbiaRiver also needs Canada to gain its rank its source is in BritishColumbia. Two Yukon tributaries also make the list

The Porcupine ranks 20th in drainage area and the Tanana is number 16 for
