I personally prefer Firefox over Chrome and Edge for a few reasons. Firstly Firefox is known for its strong privacy and security features which is important to me when browsing the web

Additionally Firefox has a wide range of extensions and add ons that allow for customization and enhanced functionality. I also appreciate the open source nature of Firefox as it aligns with my values of Mar 22 2011 I want to install the latest Firefox on my Ubuntu 64bit box

What is the best way to do this? Is there a specific update site or should I download the binaries manually? If doing manually in wh Just in general Firefox tends to be a lot more private and secure than Opera GX Firefox is quite a bit more customizable as well though if we re being honest most of those customizations are things most people will never touch In my experience Firefox is a lot less memory intensive for people like me who use a ton of tabs Jan 20 2023 I like LibreWolf a lot it s basically hardened Firefox

Only thing you need to lookout for is that it doesn t have an auto updater like Firefox you need to manually download the new version every time it s available. They are considerably fast to update to a new version after FF did

Waterfox is also a neat browser imo that is compatible with Chrome Extensions it was though bought by an ad Sep 27 2022 Hi all I recently got Firefox on my iPhone and noticed that you can t even use extensions on Firefox iOS which is a huge bummer considering I use extensions to block ads and turn all my websites into dark mode

I am more concerned about the adblocker which is uBlock Origin so is there a way to use an adblocker on Firefox iOS? Archived post Developer Edition DE is essentially re branded Firefox Beta so it is one release cycle ahead of the normal Release Firefox

While Beta tries as close as possible to what is to become the next Release DE may have some different defaults and branding In short because Firefox doesn t have this option and Vanilla Chrome doesn t really have the best GUI what could be the best browser from WebAPP besides Edge? [MUST BE CHROMIUM BLINK based because of the performance advantages that I ll need] Debian Stable 12.5 x64 Dec 25 2021 Firefox is the last major browser standing that has a completely different code base and engine

I discount Safari here not because it shares some code with Chromium it s not Chromium based but because it s not competing on all platforms. Diversity in tech and developer philosophy matters for a healthy browser landscape

Reply reply Feb 1 2024 How to install Firefox directly from Mozilla with 'apt'?
