Jan 23 2022 Homebridge is a plug and play solution for HomeKit and all the shortcomings of Homebridge stem from the shortcomings of the platform itself

I m very technical on both hardware and software but figuring out HA was more than a chore Sep 1 2023 Homebridge is amazing! I was getting frustrated with not being able to control new devices that didn t have HomeKit support finally decided to play around with Homebridge

WOW I had no idea it was so easy to setup and how well it works! It really is amazing Feb 4 2024 Start HomeBridge Run HomeBridge on your server. Add HomeBridge to HomeKit Use the Home app on your iOS device to add HomeBridge as a bridge

For detailed steps and troubleshooting you find comprehensive guides online including the official HomeBridge documentation and various tutorials on platforms like GitHub and YouTube Mar 23 2022 HomeBridge migrates easily so if you change your mind you can upgrade

I switched from a 3 to 4 no real difference cameras are a little faster to display maybe Jan 9 2008 Hello Does anybody have a site that talks you through how to setup configure and use Homebridge? I have gone to a few ok a lot and they all talk what you can do with it but they don t talk about how to set it up or how to configure them or better yet how you access them via your iOS Jan 12 2022 How does the homebridge nest and homebridge nest cam plugins compare? The plugins are software designed to run on any device running Homebridge

That device must be provided by you and configured properly. The plugins are free assuming that you already own a device capable of running Homebridge Jan 18 2023 I run homebridge as well as a bunch of other custom python services on a really old Mac mini running Ubuntu server 20.04

It runs headless and is connected directly to my crap router. Everything runs great even with 9ish plugins countless child bridges and over 100 devices accessories including 9 cameras Jun 3 2020 Another option is homebridge vera

I have around 40 Z wave devices connected to Vera and homebridge vera brings them onto Homekit brilliantly. It s pretty automatic if I add a z wave device to Vera it just shows up in Homekit after restarting the homebridge service

Just have to move the device to the room I want May 11 2023 A place to discuss Homebridge get help with it ask questions about it post plugins and more Jan 16 2024 Id reflash your RPi with the normal Raspbian image and then install homebridge on top like a normal person

Even better install docker and then use the docker version of homebridge
