As for misinformation people just don't really use it for that

There have been hundreds of articles about how deepfakes enable misinformation and yet how many deepfakes have actually fooled a lot of people? I've literally seen more deepfakes used to warn about the dangers of deepfake misinformation than actual deepfake misinformation Nov 29 2023 Something I've been seeing on the news recently is the rise of using AI and deepfakes to create porn

Recently there has been more cases of people using it to create porn of celebrities and some of even regular people they know. The people in support of this say that it's free speech and the people against it often site it as a violation of consent

While I do not use deepfake porn I also May 24 2023 15 votes 43 comments. true The goal of the r Artificial Intelligence is to provide a gateway to the many different facets of the Artificial Intelligence community and to promote discussion relating to the ideas and concepts that we know of as AI

These could include philosophical and social questions art and design technical papers machine learning where to find resources and tools how to Dec 13 2021 42 votes 29 comments. true This looks like an amazing bit of insight into the whole process and I appreciate the hard work behind this

One quick thought that worries me I'm seeing lots of world leaders here. The last thing we need is world leaders being used in deepfakes to say things they didn't say. Ethics matter with this technology

Swapping faces on actors in movies feels like a better Time is running out can a future of undetectable deepfakes be avoided? Tell tale signs of generative AI images are disappearing as the technology improves and experts are scrambling for new methods to counter disinformation Feb 2 2021 That's deepfakes

You train the faces in pairs the thing has three parts one encoder and one decoder for each face

And then you end up being able to use whichever decoder with encoder you want to turn any of the faces you trained turned into any other face you trained with Sep 26 2017 Skip to main content Open menu Open navigation Go to Reddit Home u deepfakes A chip A close button Get app Get the Reddit app Log In Log in to Reddit Expand user menu Open settings menu Log In Sign Up How we treat people's personal data is analogous to how we treat that individual and how we represent people affects how people perceive them even if they don't know about it

So yes deep fakes are unethical unless the person who is being represented and consents to it having full transparency about what the impacts might be
