Feb 9 2025 The use of psychoactive drugs without medical supervision is associated with significant health risks and can lead to the development of drug use disorders. Drug use disorders particularly when untreated increase morbidity and mortality risks for individuals can trigger substantial suffering and lead to impairment in personal, family, social, educational, occupational or other important areas. About WHO Drug Information WHO Drug Information is a quarterly journal providing an overview of topics relating to medicines development and regulation which is targeted to a wide audience of health professionals and policy makers.

Launched in 1987 WHO Drug Information communicates the latest international news and trends to regulatory agencies, academic and training institutions, researchers.

Jan 1 2015 The Unit works globally to improve health and well-being of populations by articulating, promoting, supporting and monitoring evidence-informed policies, strategies and interventions to reduce the burden associated with alcohol, drugs and addictive behaviours. Access to appropriate medications is shown to have substantial impacts on community health and the related economic indicators.

Quality assured, safe and effective medicines, vaccines and medical devices are fundamental to a functioning health system. In the Anatomical Therapeutic Chemical (ATC) classification system, the active substances are divided into different groups according to the organ or system on which they act and their therapeutic, pharmacological and chemical properties.

Drugs are classified in groups at five different levels. May 17 2024 The World Health Organization WHO today released its updated Bacterial Priority Pathogens List (BPPL) 2024, featuring 15 families of antibiotic-resistant bacteria grouped into critical, high and medium categories for prioritization. Jul 30 2024 The 8th Edition of the Philippines Essential Medicines List provides a guide to essential medicines for healthcare, prioritizing safety, efficacy and cost-effectiveness. Apr 15 2025 Module 4 treatment and care encompass all current recommendations for managing drug-susceptible and drug-resistant TB alongside patient care and support strategies.

Developed according to WHO's rigorous standards, the guidelines rely on the latest evidence reviews and the GRADE methodology to evaluate evidence quality and determine the strength of each recommendation.

Primarily aimed at Feb 9 2025 WHO announces development of updated guidelines for the psychosocially assisted pharmacological treatment of opioid dependence and community management of opioid overdose. In 2022, approximately 60 million people globally engaged in non-medical opioid use, including the use of drugs like heroin, morphine, codeine, fentanyl, methadone, tramadol and other similar.
