May 16 2020 How to Install or Uninstall Microsoft WordPad in Windows 10

Microsoft WordPad is a basic rich text editor first included with Microsoft Windows 95 and all versions of Windows since Feb 16 2024 WordPad is a lite version of Microsoft Word [part of Office] so a successor could be any number of free or paid for alternates like LibreOffice or OpenOffice which are suites and contain other programs that may not be needed but also take more room on the drive

NotePad++ has more features than Notepad Sep 2 2023 WordPad is no longer being updated and will be removed in a future release of Windows

This tutorial will show you to reset to default the open position and size of the WordPad write.exe window for your account in Windows 7 Windows 8 and Windows 10 Dec 28 2016 No Spellcheck in Wordpad? Is there a way to enable spellcheck in Windows WordPad? If there is I can't find it

I just finished writing a long narrative which had a few typos in it

Spellcheck would have been handy Sep 9 2020 Set WordPad as default That worked fine BUT when I reopened the document I was experimenting with it opened in Microsoft WORD by Default having closed that I was able to then search for the file and then reopen by right clicking and instructing the PC to open another app as WORDPAD was not automatically offered.
