An endangered species is a species that is very likely to become extinct in the near future either worldwide or in a particular region. Endangered species may be at risk due to factors such as habitat loss, poaching, invasive species, and climate change.

[1] Dec 6 2025 Endangered species any species that is at risk of extinction because of a sudden rapid decrease in its population or a loss of its critical habitat.

Previously, any species of plant or animal that was threatened with extinction could be called an endangered species. Jun 30 2025 Endangered species are those plants and animals that have become so rare they are in danger of becoming extinct.

Threatened species are plants and animals that are likely to become endangered within the foreseeable future throughout all or a significant portion of its range. Discover detailed profiles of endangered species and iconic wildlife.

Learn about habitats, threats, and conservation efforts around the globe. Learn about the world's most endangered animals, including the threats they face and the conservation efforts to protect them. Use our Information for Planning and Consultation (IPaC) tool to identify your project location and receive an official species list pursuant to 50 CFR 402.12 of federal endangered and threatened species that should be considered when evaluating the potential impacts of a project. A taxon is Endangered (EN) when the best available evidence indicates that it meets any of the criteria A to E for Endangered and it is therefore considered to be facing a very high risk of extinction in the wild. Endangered means a species is in danger of extinction throughout all or a significant portion of its range.

Threatened means a species is likely to become endangered within the foreseeable future. Jul 11 2025 What is an Endangered Species? An animal species is considered endangered when it faces a high extinction risk in the wild.

This means that the species is going extinct at a much faster pace than expected. It is a warning sign for both scientists and other creatures in nature. An endangered species is an animal or plant that is considered at risk of extinction.

A species can be listed as endangered at the state, federal, and international level.
