Apr 24 2024 I have aFaceHosted family instance if i delete the Host parent Element thefacebased family instance got <not associated> am trying to rehost to new host elementfacereference is there any api to do that in revit and i am using to createfacefamily instance by doc.Create.NewFamilyInstance Apr 25 2019 I m totally new to this and can t find a solution anywhere about this problem

I m trying to select faces however it will not select the faces that I want Apr 29 2025 See my screenshots for reference. There is a plan view section view elevation view included. I am trying to hostface based boxes to thefaceof a balcony in a theater

This balconyfaceis within the linked architectural model. The balconyfaceis angled as you can see in the section view and also curved as seen in plan Mar 12 2010 My splitfacewas done in a workset that wasn t visible

This allows to still show the different patterns but won t allow to select the split element. So either check for hidden elements in your views or set all your worksets to show in the view you want to work if you re working in a shared model Jul 11 2022 I m new to 3ds max as of today

I need to connect one side of this mesh to the other. How can I select vertices and create faces from them? Like this picture Thanks for any and all help! Dec 11 2015 Your only real option is to use face based families instead of wall hosted families

Revit will recognize thefaceof a linked object i.e. wall but doesn t allow for wall hosting through linked models. Using linked models is very common in the professional world. MEP folks link in Arch

Struct models all the time Jul 14 2024 Hi all I just got started learning how T splines work and I m not sure what keywords to search resources to use for help. My model has an open front screenshot 1 and I would like to close it like what is seen in the second screenshot

How would I go about doing this? And if you have any tips re Jun 1 2017 Select the elements from thefacebased families geometry reference planes parametric dimensions CTRL+C and CTRL+V align to view on the non host family

Re constrain and add whatever is missing Jul 22 2021 I get that facefor knurled grip is one of them but is that the sourceface or the targetface ? A quick explanation of how ReplaceFaceworks might help understand when it succeeds and when it fails

Here is a classic case for Replace Here I want to replace the topfaceof this truncate pyramid with that curvyface Mar 11 2014 2. Theres currently no way to
