<<fantasstic whores 3>> Convert card numbers to XXXX XXXX XXXX 0000 Format How to Display The last 4 digit of numbers and.

â â â â â Rating: 5 (8.329.449 reviews) - Free ´• Fantasstic ´• Access

XXXX XXXX XXXX 4567 NOTE that the 4567 digits shown above relate to the last four digits of the card number. This question helps format the string to something like 1234 5678 9123 4567 But it does not help with the format required above

While looking for answers I also came across the following solution Nov 25 2018 How to displays the last four digits of the Numbers in this format XXXX XXXX XXXX 1234

In other words use Xs for the first 12 digits of the card number and actual numbers for the last four digits of the number Now what I don t understand is why it would give me an Import Error cannot import name XXXX if I put the ex48.py in the main project folder e.g

D \LearnPython\projects\ex48 and do the import as from ex48 import XXXX

By the way the test file ex48_test.py is in D \LearnPython\projects\ex48\tests and I am running the tests using nose package Dec 3 2012 xxx xxx xxxx or xxx xxx xxxx I can create regex for the first one with Aug 23 2012 I want to format a UITextField for entering a credit card number into such that it only allows digits to be entered and automatically inserts spaces so that the number is formatted like so XXXX X Jan 10 2012 Checking whether a string starts with XXXX Asked 13 years 11 months ago Modified 2 years ago Viewed 526k times Jun 17 2019 Learn how to format phone numbers in the xxx xxx xxxx style using a number input field Apr 4 2012 Most developers have seen UUIDs Universally unique identifier but what is the reason the UUID is split into chunks like XXXXXXXX XXXX XXXX XXXX XXXXXXXXXXXX? The UUID is just a 128 bit number and May 7 2019 How do I create GUIDs globally unique identifiers in JavaScript? The GUID UUID should be at least 32 characters and should stay in the ASCII range to avoid trouble when passing them around

I m Apr 3 2013 Note To make the most voted solution work attributes in the POJO have to be public or have a public getter setter By default Jackson 2 will only work with fields that are either public or have a public getter method serializing an entity that has all fields private or package private will fail

Not tested yet but I believe that this rule also applies for other JSON libs like google.
