Feb 12 2022 the code below prints out yet I would like to see the footline only at the end even though I remove head does not work. Many thanks in advance

```
\documentclass[10pt english 8pt]{beamer} \usetheme{ 17 is it possible to define different \headerheight for head andfootrespectively? For example there is a logo image in the header which needs a large \headerheight and only text is infootwhich needs a small \headerheight
```

Or does it have two variables to control the heights offootand head respectively? I am using \columns in beamer to show two pictures. After I added \footnote{ExampleText} after captions the ExampleTest just appear in each column

Now I want to show all of the ExampleText in the Sep 20 2015 The dagger which sometimes looks like a cross has long been used to as afoot or sidenote

Here s an example from 1582 though the practice is much older than this Here s a link to the page on Google Books As you can see the dagger is used here at a secondary level from the main set of glosses which used suprascript letters

The dagger in this case is to the note on the far right by Nov 15 2023 KOMA Script has a build in feature to visualize the page header and footer package scrlayer scrpage with option draft. But IMHO the output with measuring in the background and the foreground is somehow confusing

So here an example with only one measure per head anfoot \documentclass[% % headheight=60pt % headinclude=false % default % headinclude=true % footheight=60pt % footinclude Sep 10 2018 I was wondering if someone knows if there is afoot feet symbol available in any of latex packages that I could use in my text? I would appreciate any hint

I do really mean afoot feet icon as in In a document I am using \usepackage[style=mla babel=hyphen backend=biber]{biblatex} together with the \footcite command and everything is perfect. There is a difficulty when I want to include a reference within a longer footnote containing extra text

I tried something like \footnote{extra text extra text \cite{key} extra text} but the output format of the \cite command will not be the same I would like to make the footline color black and the text white

I found this Beamer Background Color for Footline but didn t understand how it applied to my example

```
\documentclass{beamer} \us A How do I shift the footnote vertically down 1 mm or so? B I want to introduce some additional space in between onefootnote and the next one and between the first footnote and the line that Nov 17 2012 For my
```
