Hi i am running the local setup and when i am delting anentryi get a message box
KeyError some token everytime. But theentrygets deleted finally. Not sure where
this comes from. Do you have an idea? Thank you for this nice project!
TheTimeTaggersoftware ships with signed USB drivers

To verify the authenticity of the signatures Windows val idates the drivers
signature against a root trusted certificate authority CA

The trust lists are updated regularly so without internet access a computer
cannot fetch updates to the certificate trust list TimeTaggerprovides an example
default script to run theTimeTaggerapp locally in __main__.py

You can also integrateTimeTaggerinto a larger web application or extend it in
your own ways using the library TimeTaggerSupport The guide The guide is the
easiest way to learn how to use the app

You can also use it to look up how to perform specific tasks currently in
version 22.11.2 this is where it started and also in 22.11.3 when starting a new
task and entering some text in the description field when I type to search for
saved task presets and choose anentryfrom the dropdown the previously entered
text in the description field is deleted and replaced by the tag from the list
TheTimeTaggerLibrary Units of measurement Channel numbers Unused channels
Constants Enumerations Functions Helper classesTimeTaggerclasses GeneralTime
TaggerfeaturesTime TaggerThe TimeTaggerVirtual class The TimeTaggerNetwork class
Additional classes Virtual Channels Available virtual channels Common methods
Coincidence Coincidences TimeTagger classesTheTime Tagger classesrepresent the
different time tag sources for your measurements and analysis

These objects are created by factory functions in theTime Taggerlibrary
Application Programming Interface TheTime TaggerAPI provides methods to control
the hardware and to create measurements that are hooked onto the time tag stream

It is written in C++ and we also provide wrapper classes for several common
higher level languages Python MATLAB LabVIEW .NET

Maintaining this transparent equivalence between different languages simplifies
documentation and Jun 17 2024 How to HandleKeyErrorExceptions with try except
Blocks Let s start by reviewing when KeyErrors occur and how we can handle these
exceptions using try except blocks Jul 23 2025 In this article we will learn how
to handleKeyErrorexceptions in Python programming language

What are Exceptions? It is an unwanted event which occurs during the execution
of the program and actually halts the normal flow of execution of the
instructions.
