Nov 10 2025 The knowledgebase automatically integrates gene centric data from ~200 web sources including genomic transcriptomic proteomic genetic clinical and functional information Nov 14 2025 This gene is one of two neighboring gene family members that encode mitochondrial enzymes which catalyze the oxidative deamination of amines such as dopamine norepinephrine and serotonin Nov 14 2025 This intronless gene encodes a transcription factor that is a member of the high mobility group HMG box family of DNA binding proteins

This protein is the testis determining factor TDF which initiates male sex determination Nov 13 2025 Complete information for COL4A3 gene Protein Coding Collagen Type IV Alpha 3 Chain including function proteins disorders pathways orthologs and expression Nov 13 2025 The protein encoded by this gene is the gamma component of fibrinogen a blood borne glycoprotein comprised of three pairs of nonidentical polypeptide chains

Following vascular injury fibrinogen is cleaved by thrombin to form fibrin which is the most abundant component of blood clots Nov 13 2025 This gene encodes a member of the cytochrome P450 superfamily of enzymes

The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol steroids and other lipids Nov 13 2025 The product of this gene is involved in iron metabolism

It may be a component of the signaling pathway which activates hepcidin or it may act as a modulator of hepcidin expression Nov 13 2025 Complete information for KDR gene Protein Coding Kinase Insert Domain Receptor including function proteins disorders pathways orthologs and expression Nov 13 2025 The protein encoded by this gene is a metalloprotein that binds most of the copper in plasma and is involved in the peroxidation of Fe II transferrin to Fe III transferrin Nov 13 2025 The protein encoded by this gene plays a central role in the regulation of circadian rhythms

The protein encodes a transcription factor of the basic helix loop helix bHLH family and contains DNA binding histone acetyltransferase activity.
