Here thegetmethod finds a key entry for e and finds its value which is 1

We add this to the other 1 in characters.get character 0 + 1 andget2 as result  
Theget set pattern provides a structure that allows logic to be added during the setting set or retrieval get of a property instance of an instantiated class which can be useful when some instantiation logic is required for the property  
Ultimately it probably doesn't have a safe .getmethod because a dict is an associative collection values are associated with names where it is inefficient to check if a key is present and return its value without throwing an exception while it is super trivial to avoid exceptions accessing list elements as the len method is very fast

The .getmethod allows you to query the value Aug 14 2012 However if when your data structure gets more complex httpGETand without JSON your programming and ability to recognise the data gets very difficult

Therefore unless you could keep your data structure simple I urge you adopt a data transfer framework

If your requests are browser based the industry usual practice is JSON ajax jquery simplegetrequest Asked 13 years 10 months ago Modified 6 years 4 months ago Viewed 264k times 11 request.GETis the dictionary of theGETvariables in the http request made to your server for example Feb 5 2009 Is it possible to pass parameters with an HTTPgetrequest? If so how should I then do it? I have found an HTTP post request link

In that example the string postData is sent to a webserver. I wo Sep 6 2008 From what I can gather there are three categories Never useGETand use POST Never use POST and useGETIt doesn't matter which one you use

Am I correct in assuming those three cases? If so wha So I've come up with a simpler script that returns all theGETparameters in a single object

You should call it just once assign the result to a variable and then at any point in the future getany value you want from that variable using the appropriate key How toget GET variables from request in JavaScript? Does jQuery or YUI! have this feature built in?.
