The organs and the mechanisms that produce them are bona fide different

The real female ejaculation is the release of a very scanty thick and whitish fluid from the female prostate while the squirting is the expulsion of a diluted fluid from the urinary bladder
Jan 15 2024 A few days ago I went over to my friends house. We have been friends for years

We had some drinks and I stayed over at his place. Some time in my sleep I woke up choking on something. My friend was standing over me laughing with his dick in my mouth. It was his semen i was fucking choking on

I jumped up once I realized what had happened and spit hiscumout of my mouth. he repeatedly told Sep 16 2020 I also have acumfetish I really like to lick the bowl after giving a woman oral. Pleasing her I really enjoy making a womancum. Her pleasure is my pleasure I get off when she gets off

I think this is similar to some women who enjoy being submissive pleasing others can be incredibly satisfying and arousing.
