May 04 2024 09:28 AM Hi all. As my wife has been changed number from 064 to 060 old carrier has been deleted her number from the system and when we tried to login back it sends message to that old non existing number

What is solution as we can't log in back Thanks for visiting PayPal's Community Forum. I do understand that you are facing issue trying to login to your PayPal account

To get help with your concern you can reach out to the Support Team during business hours by calling us via phone call as as a Guest this does not require you to sign in to your PayPal account

Hope this helps you! Hallo zusammen ich habe vor acht Tagen meine neue Handynummer bei den Kundenservice von PayPal aktualisieren lassen um meinen Account mit der 2 Faktor Authentifizierung weiterhin nutzen zu können

Die zuständigen Mitarbeiter sagten mir es würde sieben Tage dauern bis die Nummer als vertrauenswürdig ist. I'm a reverend who is 60 years old and I have some worries regarding credit card companies. Errors can occur as you are aware

Have you ever attempted to receive a reimbursement from a credit card company? It seems to be impossible! Conversely PayPal prioritizes the consumer swiftly and appropriately Trying to login and waiting to get SMS with 6 digits number here are link if you don't receive it. But link doesn't work at all

For some reason can't get SMS with number to login. After logging in paypal shows two phone numbers mobile and home

And for some reason first number after country code in home phone number is 3 but it should be 6 Why am I not able to log into paypal using a chrome browser? For the last couple of weeks I'm not able to log into PayPal using my chrome browser I didn't receive the 6 digit login code from PayPal even after answering security questions

My mobile operator in Serbia Yettel advised me to check with PayPal PayPal customer support can't solve my issue. They ask me to wait and watch and I have been waiting for a month now

My business account verification is pending for a month now it was supposed to be done within 2-3 working days from the email I got from paypal India

No pending documents from my side While using my MacBook Air and Chrome I am unable to make a payment with Paypal or login to my account because the login pop up won't open it just has that timer circle thing going on. I have no issues with this on Safari
