May 11 2015 11 There are multiple ways of writing out a given complex number or a number in general. Usually we reduce things to the simplest terms for display saying 0 is a lot cleaner than saying $1 1$ for example. The complex numbers are a field

This means that every non 0 element has a multiplicative inverse and that inverse is unique Aug 30 2010 There are infinitely many possible values for 1^i corresponding to different branches of the complex logarithm

The confusing point here is that the formula $1^x = 1$ is not part of the definition of complex exponentiation although it is an immediate consequence of the definition of natural number exponentiation Jan 15 2013 Possible Duplicate How do I convince someone that $1+1=2$ may not necessarily be true? I once read that some mathematicians provided a very length proof of $1+1=2$

Can you think of some way to Jun 13 2020 Is there a formal proof for $ 1 \times 1 = 1$? It s a fundamental formula not only in arithmetic but also in the whole of math

Is there a proof for it or is it just assumed? Intending on marking as accepted because I m no mathematician and this response makes sense to a commoner. However I m still curious why there is 1 way to permute 0 things instead of 0 ways Mar 30 2020 This is same as AA 1

It means that we first apply the A 1 transformation which will take as to some plane having different basis vectors

If we think what is the inverse of A 1 ? We are basically asking that what transformation is required to get back to the Identity transformation whose basis vectors are i ^ 1 0 and j ^ 0 1 1 2 3 Aug 24 2016 False Proof of 1= 1 [duplicate] Ask Question Asked 9 years 4 months ago Modified 9 years 4 months ago Apr 28 2020 I m self learning Linear Algebra and have been trying to take a geometric approach to understand what matrices mean visually

I ve noticed this matrix product pop up repeatedly and can t seem to de Sep 25 2020 4 I am wondering how do I ago about calculating 1 in chances from a percentage? Example A 1 in 2 chance is 50% and 0.5 as a decimal

What I want to do I have the value 0.1431 14.3% and want to convert that into a 1 in chance any help is much appreciated thanks.
