Jun 19 2021 The symbol can be interpreted as eitherheadsortails

Granted I d also assume that since the animators aren t assuming you re gonna retry the scene with a different scenario a player can just assume that the symbol you see is the traditional headssymbol or tailssymbol of that world since it hasn t been pre established before this scene Feb 22 2023 One way to think of it is that flippingheads heads heads heads heads is just as unlikely as any other specific combination includingheads heads heads heads tails

The only reason fiveheads is significant is because we believe that arrangement is significant

Reply reply Psyese Or merely a spectacular vindication of the principle that each individual coin spun individually is as likely to come downheadstails andtherefore should cause no surprise that each individual time it does Jun 14 2023 I know 50 50heads tailsright? But help me understand the next step each coin flip has a 50 50 shot ofheadsortails

What I don t understand is how the likelihood of the next flip doesn t change. For example if I flipped a coin 10 timesandevery time it flippedheads the next flip would be 50 50tails. Wouldn t the likelihood of flipping a coin 11 timesandhaving it beheadsevery Aug 29 2020 Quest Headsortails

who did you pick? Just curious what other people chooseandwhat was your reasoning? 63 votes 112 comments

What do you call this in your language? I was watching a Vsauce video about randomness andwhen he said headsortails it Feb 14 2019 Players should consider if the coin in question is light enough not to damage or mark cards it lands onandwhether or noheadsortailscan be determined at a glance

When flipped a coin should be held at shoulder height andfully rotate at least three times before landing on the table

Coins should land as flat on the table as possible Feb 19 2019 I figured out that if you start at a specific number you can just bet more than you ve lost from a streak oftailsevery timeandas soon as you get aheads you ve made it all back plus more

Once you get aheads you can go back to the starting number. The issue here is that if you run into that cap you ll face massive losses To improve it maybe add some more flairandoptions like letting the user enter how many times they wanna flip the coin. Or keep a running tally ofheadsvstails

You could even turn it into a full fledged virtual casino with options to roll a dice card dealing etc. But no need to get too fancy yet Player Aandplayer B each
