Oct 13 2023 A heart arrhythmia uh RITH me uh is an irregular heartbeat. A heart arrhythmia occurs when the electrical signals that tell the heart to beat don t work properly. The heart may beat too fast or too slow. Or the pattern of the heartbeat may be inconsistent

A heart arrhythmia may feel like a fluttering pounding or racing heartbeat. Some heart arrhythmias are harmless. Others may cause life Oct 22 2025 A normal resting heart rate for adults ranges from 60 to 100 beats per minute

A heart rate above or below that may signal a health condition Mar 11 2022 Heart palpitations pal pih TAY shuns are feelings of having a fast beating fluttering or pounding heart. Stress exercise medication or rarely a medical condition can trigger them

Although heart palpitations can be worrisome they re usually harmless

Rarely heart palpitations can be a symptom of a more serious heart condition such as an irregular heartbeat arrhythmia that might Dec 15 2023 The fast heartbeat may be discovered when a physical exam or heart tests are done for another reason

In general tachycardia may cause these symptoms Racing pounding heart or flopping in the chest called palpitations. Chest pain. Fainting. Lightheadedness

Rapid pulse. Shortness of breath. When to see a doctor Many things can cause Mar 4 2025 An irregular heartbeat called an arrhythmia. An unexplained stroke

Unexplained fainting. An implantable loop recorder can see changes in the heartbeat that other heart recording devices may miss. For example it may find irregular heartbeats that are brief or that only happen once in a while Symptoms The main symptom of atrial tachycardia is a very fast heartbeat

Typically during atrial tachycardia the heart beats 150 to 200 times a minute. The fast heartbeat may come and go suddenly or it can be ongoing. Other symptoms of atrial tachycardia may include Pounding or fluttering feelings in the chest or neck called palpitations. Chest pain

Fainting or almost fainting Oct 3 2025 Atrial fibrillation AFib is a heart rhythm disorder. In a typical heart a group of cells called the sinus node sends electrical signals that start each heartbeat. The signals go across the upper heart chambers to the AV node where they usually slow down

Then the signals go to the lower heart chambers causing them to squeeze and pump out blood. But in AFib the signals in the upper Mar 6 2024 Ventricular tachycardia is a type of irregular heartbeat called an arrhythmia. It starts in the lower chambers of the heart called the ventricles
