Jul 28 2015 We took in a spayed female that turned out to be ahermaphrodite the original owner didn t understand the vet due to a language barrier. Anyway ZsaZsa was a cryptorchid had undescended testicles and had to have exploratory surgery to be castrated too

It wasn t necessary due to behavioral issues but because of an increased risk of Sep 24 2019 It s not likely but possible that the cat is either an inter meaning the genitalia were indistinct enough that it wasn t possible to determine the cat s sex by means of a quick external examination especially if the testicles descended rather late or that he s ahermaphrodite something I ve seen 4 times over the past 45 years so it s.
