Treatments include Oral calcium

These calcium supplements are taken by mouth as tablets, chews or liquid. They can raise calcium levels in your blood Jun 12 2025 Hypoparathyroidism Hypoparathyroidism is a rare but treatable condition that causes low levels of calcium in your blood

Damage to your parathyroid glands during surgery and certain genetic and autoimmune diseases can cause it. Treatment usually involves calcium and vitamin D supplements Mar 20 2025 People can use methods such as dietary changes, supplements, diuretics and hormone replacement to manage low parathyroid hormone levels

Hypoparathyroidism is a rare condition in which the treatment will depend on your symptoms, age and general health. It will also depend on how severe the condition is. An IV intravenous infusion of calcium may be able to ease your symptoms right away if your calcium levels are very low

You may also need to take calcium and active vitamin D pills. How is hypoparathyroidism treated? Unlike most other hormonal deficits
