I am the kind of person who hashugebursts of energy for a particular thing and refrain from going back to it after I lose this burst of energy

For example at one point I was reading fairly in depth more than the average person about the Syrian civil war and I learnt a lot about the entire conflict
The combination of these 2 parameters hashugeeffects on the mutation rates that we compute

it can correct the mutation rate for the plating efficiency proportion each culture that is plated directly So what is holding that 1 miles of space whether it be a near perfect vacuum or as on Earth containinghugeamounts of matter

The actual structure that holds 1 mile of vacuum space and 1 mile of matter must be the same thing So what is that is holding the 1 mile of space and 1 mile of Earth matter I personally think that it s the tonic immobility that makes Sharks easier prey for Orcas because a biologist said that in a contest the Orca would be desperately undermined if it doesn t flip the shark over because obviously the shark poseshugeangers? Hi About 5 years ago i think it was a morning I was walking on a small countryside road in north of France Then I looked on the side and I saw the moon being veryhugecompared to usually It scared me i think it looked about twice the size as usual I don t remember Joined August 31 2004 Last visited September 16 2014View Profile Find content MATTER >Molecules >Atoms electrons protons nuetrons Electrons and protons and nuetrons are all forms of energy

Even though a neutron is considered neatrual that doesnt meant its not energy. Those three portions of energy make up matter. Electrons are ahugecomponent of what goes on in the universe. Also other forms of energy are attracted to another

Gravity though is an effect that is yes it looks definitely cut but to me the most probable assumption is that it was a manufacturer oversight. the cut looks the way glass tubes for glass work usually come

anyway i don t see what possible continuation that tube might have given the grounded joint above where only a very small flask would fit I m aHUGEResearcher on the internet. I can normally come up with anything After a few hours. Or even days. But this one is a puzzle

Nothing fits it. So I turn to forums for a little help to see if anyone else has heard of this had this or any other advise. Most replies are heart felt and wonderful

Others you take with a grain of salt Moontanman You wrote in response to my quoting an article in the NY Times You are actually going to offer a reference
