Jays are a paraphyletic grouping of passerine birds within the family Corvidae

Although the term jay carries no taxonomic weight most or all of the birds referred to as jays share a few similarities: they are small to medium-sized, usually have colorful feathers and are quite noisy. Jays are of about 35 to 40 bird species belonging to the family Corvidae, order Passeriformes, that inhabit woodlands and are known for their bold, raucous manner. Jays are medium-sized, colorful and noisy birds that belong to the crow family Corvidae.

There are about 30 to 45 species of jays globally and 12 of these can be found in North America. They can be classified into three groups for simplicity:

Old World jays are brown-colored from Afro-Eurasia. JAY definition: any of several noisy, vivacious birds of the crow family subfamily Garrulinae, as the crested Garrulus glandarius of the Old World, having brownish plumage with blue, black, and white barring on the wings.
