Oct 15 2010 I'm trying to download JQuery. When I click the minified version I just get a bunch of code displayed in the browser. I don't actually download anything

What am I supposed to do? How do I download Download File Using jQuery Asked 16 years 4 months ago Modified 1 year 4 months ago Viewed 589k times Sep 22 2009

This Stack Overflow page provides guidance on how to install the jQuery library for use in web development projects Aug 17 2010 I have a jquery based single page webapp

It communicates with a RESTful web service via AJAX calls. I'm trying to accomplish the following Submit a POST that contains JSON data to a REST url. I Apr 28 2015 The jQuery 1.x line had major changes as of jQuery 1.9.0

We strongly recommend that you also use the jQuery Migrate plugin if you are upgrading from pre 1.9 versions of jQuery or need to use plugins that haven't yet been updated

Read the jQuery 1.9 Upgrade Guide and the jQuery 1.9 release blog post for more information Unfortunately pointing the main window's URL at your file download means you have little control over what the user experience is when a file download occurs

I created jQuery File Download which allows for an Ajax like experience with file downloads complete with OnSuccess and OnFailure callbacks to provide for a better user experience Apr 12 2013 29 I'd like to download the latest version of Microsoft jQuery Unobtrusive Validation however I don't like using NuGet since it is not possible for me to tell it where to install the packages within my project structure

Does Microsoft host these files somewhere that I can access them directly? In order to make JQuery knows the file download just occurred your response header must contain Set-Cookie fileDownload=true path=. In Java Jun 25 2013 122 I have a content div with the id as content

In the content div I have some graphs and some tables. I want to download that div as a pdf when user click on download button. Is there a way to do that using javascript or jQuery? Jan 27 2016 I want to download the file which is coming in the form of bytes from the AJAX response

I tried to do it this way with the help of Blob var blob=new Blob [resultByte] {type quot;application pd.
