Jul 24 2016 What is the page about blank used for? I was just wondering why is it there. Is it an actual page or just built in? It seems to be completely empty except with the header and body May 17 2019 1 I know about Tabs goes to the New Tab page and about blank goes to a predictably blank page

But how and why did this function come about? And are there other keywords that come after about with different functions? Nov 2 2010 In my case even though I had added about blank as the page to open under On startup > Open a specific page or set of pages Chrome still opened to the Bing search home page every time I launched it

Admittedly Bing search was my default search engine but still in my opinion it should not have overridden the On startup setting Jan 12 2011 Easiest way to find this info is from the about URI scheme Wikipedia entry. Note that on Windows Internet Explorer s about addresses are configurable

It is therefore possible that some of the listed addresses will not work on a particular computer There s a list of common about addresses and a list of those for Internet Explorer about home Displays the user s home page

about blank May 20 2015 I am annoyed by the thumbnails that are shown when opening a new tab in Google Chrome. I want to see a blank page. How to do that? Closed 10 years ago

Can we change new tab to about blank without installing any extension for latest chrome versions? Jan 30 2015 Is there a built in way in Firefox to blacken or to colour the about blank page? Will I maybe save some energy by doing so? Oct 20 2009 All browsers I tested support about blank as a URL for an empty page

I understand the blank but where comes the about from? Dec 28 2021 In Google Chrome we have an option to create shortcuts on the home screen the content that appears upon creating a new tab

I want to create a shortcut to about blank which normally is a valid UR On the other hand as you wrote you can use a VBS or PowerShell script for opening Internet Explorer instead of redirecting to Edge. VBS Script Create .vbs file with the script below. Run VBS file

Internet Explorer will be started but will not go to foreground. Set ie = CreateObject InternetExplorer.Application ie.Navigate about blank ie.Visible = 1 PowerShell script Create .bat file.
