

<<kaylanis favorites>> Is Thingiverse still the easiest best way to find free STLs? With thingiverse going down in quality.

Jul 13 2023 Thingiverse is still very valid and growing. I actually looked at the data from their API to see how much it has grown over the years and whether the rate has decreased it doesn't seem like it has Jan 11 2022 Thingiverse definitely used to be infinitely worse than it is now

I think people complaining about quality doing down lately must be newer people to 3d printing Feb 26 2022 It seems Thingiverse has disabled 1 click downloading of items listed

So the 90 file storage system I've found that has 90 parts it snow a 10 minute ordeal to download instead of 1 click for a zipped file

So has anyone got any recommendations to alternative sites like Thingiverse? Nov 25 2022 Thingiverse and cults3d are both legit and probably the first stop for most printers

Thingiverse is for free models but quality is all over the place and cults is better quality models but most have a price tag Apr 15 2024 Getting Familiar with 3d printing and how to use Thingiverse? I saw some things on Thingiverse I want to print

I do not have direct access to the printer however as it is through the library

Typically you send the file to them with colour choices infill I think and what percentage size you want the item to be Dec 14 2022 Printables or Thingiverse? I'm mostly a creator and don't often download other people's designs just post my own

I'd like to know from the perspective of someone who downloads others' designs which sight do you prefer and why? Currently I will take a model from thingiverse and upload it into maker world from my own profile and then download it from there which is a very long and tedious process but when I'm in Bambu studio my thingiverse files don't show as an option how can I change this? Thingiverse suffers from episodes of appallingly bad performance and the search function is sketchy at best Feb 26 2023 15 votes 15 comments

Like the title says is there a website like thingiverse but one that focuses more on resin models? Jul 18 2023 My brother just got into 3D printing for our warhammer 40K games. Has a Bambu P1P. He is looking to test some free terrain files. Please comment.
