Line replaceable components for 787 flight deck control panels Korry offers a complete list of line replaceable components to service all Flight Deck Control Panels used on Boeing 787 model aircraft including control panels pushbutton switches annunciators and knobs

All part numbers are unique to the 787 and are identified in the tables on the reverse. The nose landing gear NLG and doors is strut assembly that retracts rearward and is completely enclosed by its door system when part of the strut forging

The strut is connected to the top of the strut and a drag axle which is located at the lower end of the drag brace assembly incorporates an down or up position

The nose gear trunnion retract GEAR CONTROL PANEL MLG3 LANDING GEAR CONTROL. The landing gear control is located on the right side of the center instrument panel. The control lever has two positions: landing gear control switches. The control panel puts signals to the landing gear control actuators.

See figure 1-3. The electrical landing gear retraction system is operated by the white wheel shaped switch on the upper portion of the flight panel

To raise the gear the knob is pulled out and the switch moved up to its upper detente. Total Score for Nose Panel Landing is at consistent points in your pattern and note the change in elevator trim necessary to maintain the desired airspeed on downwind base and final approach.

If you're doing this at a towered airport ask for the option. This landing clearance takes the place of cleared to land or cleared touch and go.

Cleared for the option TAILOR THE SYSTEM TO THE INDIVIDUAL NEEDS OF YOUR BUILDING. KONE Destination is available in two configurations: hybrid or traditional. Destination operating panel on main floor Standard landing call station on other floors. Elevator identifier on main floor HWHSYSTEM IDENTIFICATION GUIDE LEVELING STABILIZING LANDING GEAR SYSTEMS.
